SUMMARY

Software Engineer with 1.8+ years of experience in **Java**, Spring Boot, Angular, SQL, and **REST API** development. Experienced in enterprise application development, **production support**, root cause analysis, **troubleshooting**, and **defect resolution**. Strong understanding of backend systems, frontend development, and database operations. Actively learning **Salesforce technologies** through **Trailhead** while continuously expanding expertise in cloud and enterprise application development. Strong problem-solving and analytical skills with a passion for continuous learning.

TECHNICAL SKILLS

Programming Languages: Java 17, SQL, JavaScript, TypeScript, Python
Backend: Spring Boot, RESTful Web Services/APIs, JWT, JPA/Hibernate, Microservices
Frontend: HTML5, CSS3, Angular 20
Databases / DBMS: MySQL, PostgreSQL, JDBC
Tools: Git, VS Code, Postman, IntelliJ IDEA, Log4j, Maven, Swagger

EXPERIENCE

LTM | Software Engineer Dec 2024 – Present | Mumbai, India
Project: Citi iOps Portal

- Enterprise Application Development (Java, Spring Boot):** Developed and enhanced backend services and REST APIs for onboarding, assessment, and resource management workflows.
- Frontend Development (Angular):** Built and maintained business workflows, dynamic forms, and data-driven UI components for enterprise applications.
- Production Support & Troubleshooting:** Performed root cause analysis, defect resolution, and issue investigation for production incidents and user-reported problems.
- API Development & Database Management (REST APIs, MySQL):** Designed APIs and optimized database queries to support business processes and improve application performance.
- Agile Development & Collaboration (Git):** Worked with cross-functional teams on feature development, code reviews, deployments, and production releases.

PROJECTS

MarketPilot - Paper Trading Platform

Technologies: Java, Spring Boot, Angular, PostgreSQL, REST APIs, Yahoo Finance API

- Stock Search & Market Data (Yahoo Finance API):** Integrated market data APIs for stock discovery and historical data retrieval.
- Paper Trading Engine:** Developed simulated buy/sell order execution, holdings management, portfolio tracking, and profit/loss calculation functionality.
- Backend Development (Spring Boot):** Built REST APIs for portfolio, holdings, transaction, and order management.
- Frontend Development (Angular):** Created interactive dashboards for stock analysis and portfolio monitoring.
- Database Design (PostgreSQL):** Managed portfolio, holdings, user, and transaction data using relational database structures.

ACHIEVEMENTS & LEARNING

- Salesforce Trailhead Learning:** Apex, SOQL, Lightning Web Components (LWC) and Service Cloud Fundamentals.
- Oracle Certified Professional: Java SE 11 Developer (OCJP)** January – 2025
- Hacktoberfest Contributor** 2023, 2024

EDUCATION

Sinhgad Institute of Technology Feb 2020 – Jun 2024
Bachelor of Information Technology — **CGPA: 7.78** Pune, Maharashtra
